ESCOLA INTERNACIONAL
DEL CAMP - SALOU

A new way of learning
The Escola Internacional del Camp - Salou (EIC) a school for the 21st century

The Escola Internacional del Camp - Salou (EIC) is an innovative academy, meeting students’ needs with an educational model designed to evolve according to new, and constantly changing, demands:

• Encourages students’ holistic development.
• English, Catalan and Spanish are the main languages of the school.
• Blends the best Catalan educational tradition, with pre-eminent international models.
• Contributes to the economic, social and cultural development of the region.

The school is owned by Fundació Escola Internacional del Camp (FEIC), a not-for-profit organisation.
To become a student at the EIC is to step into the future

The EIC academy offers a comprehensive curriculum, covering every stage of students’ education.

- **Nursery School**
- **Preschool**
- **Primary**
- **Secondary (ESO & Baccalaureate)**
- **International Baccalaureate**
- **Vocational Education**

The EIC academy offers a complete education to students aged 1 to 20. Year after year, they increase their creativity, sense of responsibility, independence, entrepreneurial spirit, and language fluency, so as to be able to further their education in either national or international universities.

Throughout their education, from the age of 1 to 20, students learn the skills that prepare them for the next stage.
The EIC uses the Sòcrates Educa® educational model

The main goals of the Sòcrates Educa educational model are:

- To promote educational excellence, world-class knowledge, skills development and self-awareness, while embracing a diverse society.

- To combine a balanced knowledge of science, technology, humanities and the arts, while mastering languages and the most advanced communications skills.

- To actively promote physical activities and sports, both from a health and educational standpoint.

- To promote free and open thought, creativity and self-motivated, independent learning with:
  - Diligence, discipline and initiative.
  - High standards and a strong work ethic.

- To encourage values of:
  - Responsibility
  - Social conscience
  - Respect for social and cultural diversity
  - Team work and co-operation
  - Community participation
  - Respect for the environment.

- To prepare students for living, working and becoming good citizens in both the present and future society.
Sòcrates Educa encourages students to:

• Build their self-motivated learning skills.
• Learn to be a mentor to fellow students.
• Master problem-solving skills.
• Learn to work in a team.
• Develop communication skills.
• Contribute to their community and society at large.

The following are fundamental to learning:

• Problem resolution
• Experimentation
• Interdisciplinary learning
• Crossing the boundaries of knowledge

Sòcrates Educa is an innovative, flexible and imaginative educational model, which:

• Places the student at the centre of the learning process.
• Forms the basis for a diverse, co-ed and multilingual teaching model.
• Is rooted in the best Catalan and international educational models.
• Is built by the community, for the community, with diversity and globalism in mind.

“A teacher should not only impart knowledge, but also give students the tools so they can learn for themselves”
Socrates

Sòcrates Educa encourages students to:

• Build their self-motivated learning skills.
• Learn to be a mentor to fellow students.
• Master problem-solving skills.
• Learn to work in a team.
• Develop communication skills.
• Contribute to their community and society at large.
The EIC strives for educational excellence

The Sòcrates Educa model is structured around four main pillars:

1. **Internationalisation**
   - All students are fluent in English, Catalan and Spanish when they graduate.
   - The learning of a fourth foreign language (either Asian or European) is actively encouraged.
   - The academy is strongly engaged in exchange programmes (for both students and teachers) with other schools across the globe.

2. **Mastering technology skills**
   - An efficient, permanent and innovative use of emerging technologies is a cornerstone of the EIC academy.
   - Not only as an end in itself, but also as an instrument of:
     - learning
     - relating to other students, teachers, family members and the wider community.
3. Commitment to the community

• The EIC academy runs the ‘Service-learning’ programme, an educational community initiative, which promotes:
  - Learning and personal development.
  - Helping the wider community.
• Apart from receiving a high-quality education, students participate in several voluntary activities, which:
  - Enrich their learning.
  - Contribute to the well-being of the community.
• Through such a scheme, the EIC academy promotes a social conscience, strong work ethic and generosity towards others.

4. Sustainability

• The values of sustainability and respect for the environment are fundamental to the EIC academy, ranging from the way its buildings are built, to its day-to-day activities:
  - Through the use of several green energy initiatives, including solar panels and rainwater harvesting.
  - Taking a strong sustainability stance allows the EIC academy to promote an educational approach based on self-restraint and responsible consumerism.
The EIC promotes fundamental values

• Equal rights, a sense of responsibility and opportunities for all.
• Social conscience and self-restraint.
• Respect for others, authority, property and the environment.
• Holding strong values while keeping an open mind.
• Innovation.
• Democracy and morality.
• Pacifism and peaceful coexistence.
• Strong work ethic.

The EIC guides students throughout their educational journey

The EIC academy has its own pastoral care service serving:
• Tutors and teachers.
• Students and their families.
Throughout the students’ education, and especially at times of change, high-quality, pastoral care is offered, along with other services, such as a parents’ school and diversity awareness training.
The EIC is much more than a school

Apart from providing an excellent education, the EIC academy plays a central role in the community. The students, their families and the local community are brought together by the school, chiefly through the ‘Service-learning’ programme.

The EIC academy also offers scholarships with the aim of promoting:
• Fair and open access to the school.
• Equal rights and opportunities.
• Social cohesion.

The EIC academy also opens its doors to the community, providing:
• Facilities: sports areas, an auditorium, study and conference rooms and a library, among other resources.
• Educational services: counselling, language tuition, conferences and summer camp programmes.
The EIC, 30,000 m² of space for a new way of teaching and learning

The building complex is dedicated exclusively to the activities of the Escola Internacional del Camp - Salou (EIC), with a capacity to welcome 1,200 students.

The indoor spaces are flexible and easily adapted to different educational needs. The outdoor spaces, apart from their aesthetic value, are also designed to enrich learning:

• The Forum area is the meeting point of the school community.
• The gardens provide an ideal setting for learning about sustainability, the environment, discipline and developing a sense of responsibility.
• The extensive sports areas promote health and team work.

The EIC, close to all families in the Camp de Tarragona region

The EIC academy meets the need for an international school in a region of leading technology, tourism, educational and research development.

The EIC academy is in Salou, strategically located in a central, easily accessible area (by car, train or bus), and close to national and international transport hubs (rail, airport and seaport).

Salou is 110 kms (70 miles) south of the city of Barcelona, the world-class business and cultural hub.
The EIC, a school for the community, by the community

The Camp de Tarragona region will have, for the first time, an international, multilingual school, which will be the first to offer teaching based on the Sòcrates Educa educational model.

The EIC academy will contribute high-calibre graduates to the region, who:
• Have received an excellent education.
• Have an international and entrepreneurial outlook.
• Are multilingual.
• Are skilled in new technological advances and can adapt to change.

This will promote:
• Increased awareness of the Camp de Tarragona region, especially in terms of educational excellence.
• Bring significant economic benefits to the area.

This project seeks sponsorship from foundations, corporations and institutions, as well as from families who believe in and support the aims of the project.
On graduation students are fluent in at least three languages and skilled in the latest technological advances.
